

MOHD IRSHAD

SENIOR RPA DEVELOPER | UIPATH EXPERT

Bengaluru, Karnataka, India • +91 70174 90725 • irshadkohli18@gmail.com

PROFESSIONAL SUMMARY

Results-oriented RPA Developer with 4 years of experience designing, building, and deploying end-to-end automation solutions using UiPath. Delivered 20+ automation projects across Finance, Customer Service, and Supply Chain domains, consistently reducing manual effort and processing time. Proficient in REFramework, Orchestrator, SQL, Python scripting, and Excel automation, with hands-on experience integrating REST APIs via HTTPS and APEX, managing bot infrastructure on virtual machines, and tracking delivery through ticketing systems and KPI reporting. Skilled in requirement gathering, PDD/SDD documentation, stakeholder communication, and UAT/hypercare support. Currently pursuing an Executive Post Graduate Certification in Data Science & AI to strengthen analytical capabilities alongside automation expertise.

TECHNICAL SKILLS

RPA Tools: UiPath, REFramework, Orchestrator, Queues

Programming & Query Languages: Python, SQL

Automation Expertise: Gmail Automation, PDF Automation, Excel & Excel Macros, Web Scraping, Desktop Automation, Data Entry & Processing

Integration & Systems: REST APIs, HTTPS Integration, APEX, NetSuite

Infrastructure & Operations: VM Management, Ticketing Tools (Incident & Change Management), KPI Matrix & Reporting

Domains: Finance & Accounting, Customer Service, Supply Chain & Fusion Order Management

Process & Soft Skills: Requirement Gathering & Process Design, PDD & SDD Documentation, Stakeholder Communication, UAT Support & Hypercare, Cross-Functional Collaboration, Analytical Thinking & Problem Solving

PROFESSIONAL EXPERIENCE

Senior RPA Developer | Oracle India Pvt. Ltd.

2023 – Present

Environment: UiPath, SQL, REST APIs, Orchestrator, NetSuite, Excel Automation, Web Automation, Windows Automation

- Designed and developed UiPath bots for business-critical Supply Chain and Order Management functions, integrating HTTPS and APEX for real-time data validation.
- Delivered 15+ automation projects end-to-end, from requirement gathering and process design through PDD/SDD documentation to production deployment.
- Provided production support for live bots, monitoring scheduled runs, troubleshooting failures, and ensuring minimal downtime for business-critical processes.
- Handled VM provisioning and configuration for new bot deployments, and migrated/shifted bots across virtual machines to balance load and maintain business continuity during environment changes.
- Managed and maintained virtual machines used for bot execution, ensuring uptime, environment stability, and timely patching/configuration.
- Logged, tracked, and resolved automation issues through ticketing tools, maintaining SLAs for incident and change management.
- Maintained KPI matrices to track bot performance, exception rates, and throughput, reporting metrics to stakeholders for continuous improvement.
- Led user acceptance testing (UAT) and post-deployment hypercare support to ensure smooth transition to business-as-usual operations.
- Partnered with business stakeholders and cross-functional teams to identify, prioritize, and scope high-impact automation opportunities.
- Built reusable, scalable automation frameworks that reduced maintenance overhead and improved bot reliability.

RPA Developer | Rapidflow Technologies

2022 – 2023

Environment: UiPath, REFramework, Orchestrator, Excel Macros, Gmail, PDF, Desktop Automation

- Delivered automation solutions spanning Gmail, Excel, PDF, and desktop environments to streamline recurring finance and reporting workflows.
- Built reusable workflow components using REFramework and maintained bot reliability and monitoring through Orchestrator.

- Raised and tracked support tickets for bot failures and environment issues, coordinating with infrastructure teams for timely resolution.
- Owned process documentation (PDD/SDD) and supported the full automation lifecycle from design through go-live.

KEY PROJECTS

Project 1: NetSuite Upsell Orders Automation

Objective

Automate the manual process of order vetting, provisioning, billing schedule setup, and initial invoice generation in NetSuite to reduce processing time and errors.

Tools & Technologies

UiPath, REFramework, Orchestrator, HTTPS Integration, APEX, NetSuite, Excel

Key Contributions & Impact

- Designed and deployed a UiPath solution using REFramework to automate end-to-end NetSuite Upsell Order processing, including validation, provisioning, and invoicing.
- Integrated with APEX via HTTPS calls to fetch and validate order data dynamically before provisioning across production and sandbox environments.
- Deployed the bot on Orchestrator with real-time monitoring, logging, and exception handling for unattended execution.
- Reduced average transaction time from 15–20 minutes to 6 minutes while processing 60+ orders daily with consistent, error-free output.
- Achieved 65–70% time savings per transaction and eliminated manual processing errors through API-based validation, freeing up staff for higher-value work.

Project 2: Rebooking Automation (CMRB)

Objective

Automate a complex manual rebooking process spanning 13 sub-processes across three systems (APEX, FDM, and FOM) to eliminate manual handoffs, reduce errors, and speed up the workflow.

Tools & Technologies

UiPath, REFramework, Orchestrator, HTTPS Integration, Excel, Email Automation

Key Contributions & Impact

- Developed a bot to manage the full rebooking lifecycle: downloading input data from APEX, applying decision logic and capturing exceptions in FDM, performing rebooking and updating records in FOM, and posting final updates back to APEX via HTTPS API calls.
- Automated handling of 10+ business exceptions with routing and exception tracking, plus automated status emails (Success/Failure/Partial) to operations after each transaction.

EDUCATION & CERTIFICATIONS

Executive PG Certification, Data Science & Artificial Intelligence: Intelipaat — Ongoing

Python Programming: IIGHT, Gurgaon, Haryana — 2022 – 2023

MCA (Master of Computer Applications): IFTM University, Moradabad, U.P. — 2020 – 2022

BCA (Bachelor of Computer Applications): IFTM University, Moradabad, U.P. — 2017 – 2020

Certifications: RPA Developer Foundation • RPA Developer FastStart • RPA Document Understanding

AWARDS & RECOGNITIONS

- Star Performer Award (Q2 FY25) — Honored for consistent excellence and high-impact automation delivery.
- YAR Award — Recognized for innovation and process improvement in automation.
